

## MAX Technical Access Sheet – Version 1.4

Date: 2025-11-28

This document provides verified technical references and structured download access points for MAX system artifacts via Filebase/IPFS. All entries are deterministic and can be verified.

### Integrity Verification

All artifacts include an MD5 hash for optional integrity validation. A typical verification command is:

```
md5 <FILENAME>
```

### Requirements

An S3-compatible client such as aws-cli, rclone, or the MinIO client is required to retrieve artifacts directly via Filebase/IPFS.
